
LAUNCH YOUR
FIRST BI PROJECT
IN 5 DAYS OR
LESS

Launch my first BI Dashboard up in 5 days or less?

Launching a BI project is a daunting task that requires months of preparation, data cleansing and management, hardware and software decisions, management buy-in and then more months of implementation time.

SISENSE IS THE ONLY BI SOFTWARE THAT TAKES THE COMPLEXITY OUT OF BI AND GIVES EVERY BUSINESS USER THE ABILITY TO GET BI UP AND RUNNING WITH LITTLE TO NO IT HELP.

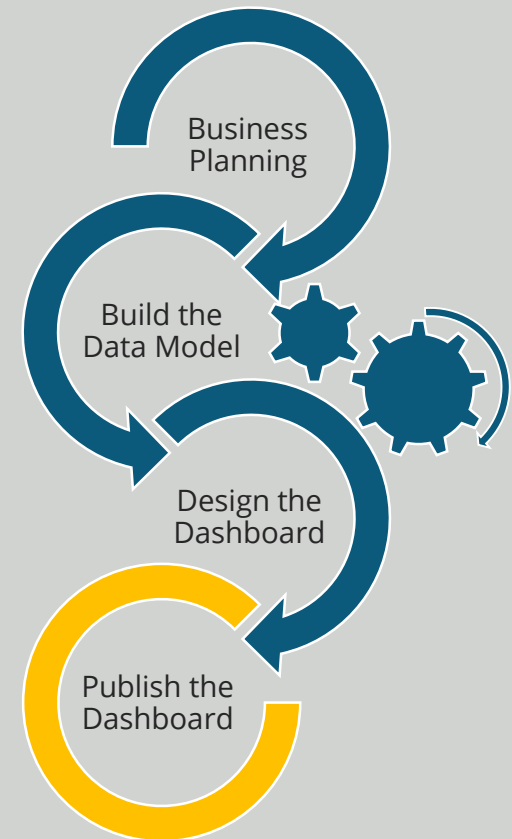

4 Steps in **5 days** and you'll have your first BI dashboard published!

Create a project scope with small milestones

- Adopt an iterative approach and focus on standard business processes first
- Start small with a few data sources and several reports
- Get more complex as you grow: handle exception situations in subsequent analysis

SISENSE'S ELASTICUBE TECHNOLOGY LETS YOU START SIMPLE AND INCREASE TO TERABYTES OF DATA AS YOU GROW, THE ONLY TRULY SCALABLE BI SOLUTION AVAILABLE.

Expected Time: ½ day

Day 1

Day 2

Day 3

Day 4

Day 5

Collect requirements

Understand the business objectives beyond the specific report request by asking: Why is this data being examined?

- **Business Requirements** - Pinpoint the types of analysis needed for the business vision
- **Functionality & Usability Requirements** - Regard how analysis needs to be visualized in order to be understandable to your team
- **Technical Requirements** – Consider deployment and scalability, hardware resources, backup and platform availability

SISENSE IS THE ONLY TOOL THAT FOCUSES ON GETTING YOU THE ANSWERS YOU NEED FROM YOUR DATA EASILY WITHOUT FALLING SHORT ON FUNCTIONALITY, SPEED AND SCALABILITY.

Expected Time: ½ day

Day 1

Day 2

Day 3

Day 4

Day 5

Set up an effective data model

Transform data into an enterprise information asset that is consistent, comprehensive and current.

- **Design the data model:**
 - Select data sources you want to analyse
 - Understand the correlation between the data sources
 - Join the data from multiple sources to get a single source of truth from the data
- **Define the specific measurements**
Understand how you can use the data to create measurements based on the data model

SISENSE IS THE ONLY SOFTWARE THAT GIVES YOU THE ABILITY TO EASILY JOIN INFORMATION FROM MULTIPLE DATA SOURCES USING OUR UNIQUE, HIGH-PERFORMANCE ANALYTICS DATABASE THAT CREATES A CENTRAL WAREHOUSE OF YOUR DATA.

Expected Time: 2 days

Day 1

Day 2

Day 3

Day 4

Day 5

Build your first rich dashboard

Create web-based dashboards, reports and interactive analytics in minutes, and share them with your team.

- **Identify target audience** - Understand what type of dashboard you want to create based on its value to your organization
- **Design your dashboard** - Choose graphs, charts, and filters to make the dashboard the most useful and engaging
- **Information design**- Communicate the information in a way that is understandable

SISENSE LETS YOU BUILD DASHBOARDS WITH THE ABILITY TO DRILL INTO DETAILS AND ZOOM OUT TO THE BIG PICTURE. OUR BEAUTIFUL VISUALIZATIONS ENSURES YOUR RESULTS ARE EASY TO ABSORB AND ENHANCE.

Expected Time: 2 days

Day 1

Day 2

Day 3

Day 4

Day 5

Launch your first BI dashboard in 5 days or less
